Re: Information regarding letters received about the adjudication of water rights

To Customers and Residents of White City Water Improvement District:

Many of you were mailed a notice and Summons from the Utah Division of Water Rights informing you about an adjudication of water rights being conducted in district court for our area. This letter is written to provide some basic information as it relates to the adjudication and your water service from White City Water Improvement District (the "District").

If the only water you use on your property is supplied from your connection to the District, the adjudication does not require you to take any action, such as filing a claim for a water right. The District, and its wholly owned subsidiary White City Water Company, owns the water rights for the District's water supply. The District will take all necessary actions to ensure its water rights are fully protected and included in the water rights adjudication.

As part of the adjudication process, the State Division of Water Rights mails notices to all property owners within the area being adjudicated, whether or not you may actually own a water right. Most of you likely received notice simply because you own property.

But in the event you use water on your property not supplied by the District, like from a spring, well or stream on your property, you should direct any questions about whether you might own a water right to the Division of Water Rights (801.538.5282) or visit their website.

If you have any questions, please call either myself or Rhonda Withers, Assistant General Manager, during regular business hours from 8:00 AM to 5:00 PM (Mtn Time), Monday through Friday.

Sincerely,

Paul H Ashton

General Manager/General Counsel
